**NEW FEATURES NOW AVAILABLE**

## **RealLegal® E-Transcript™ 5.0**

Our goal at RealLegal is to deliver REAL Solutions... solutions that are easy to use; solutions that improve your routine; solutions that contribute to your success. The latest RealLegal E-Transcript fulfills those objectives with its impressive line-up of enhancements that make E-Transcript 5.0 work better for you!

### **NEW IN VERSION 5.0**

- **A more user-friendly interface**
- **Enhanced E-Transcript Viewer**
- **Powerful and intuitive Batch Print Wizard**
- **Branded cover pages with your firm's logo**
- **Improved condensed printing**
- **Dictionary Report tool that helps manage new vocabulary**

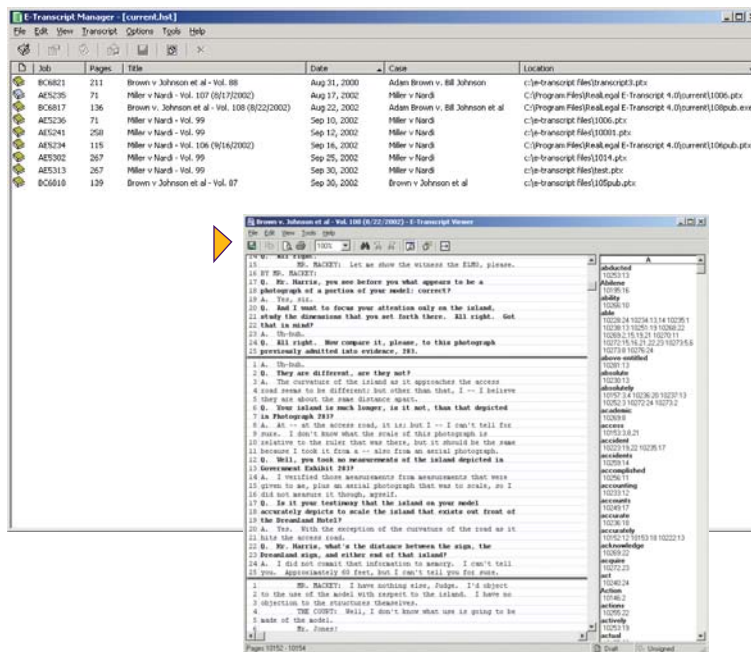

### **Enhance the User's Experience**

We've updated the interface for both E-Transcript Manager and the E-Transcript Viewer (shown right) to make it more user friendly for court reporters and their clients.

The E-Transcript Manager interface now has 18 sortable columns that users can choose from to display transcript information. For example, a new "Job Number" field has been added, and passwords and unlock codes can be "copied" from the interface to send to clients. Other columns include errata, cover, sealed, unlock, password, title, first, last, volume, date, type, case, pages, plaintiff, defendant, and location.

Wizards and dialog boxes within the program have been streamlined for usability and aesthetics.

The E-Transcript Viewer enhancements include sleeker toolbar icons and more familiar menus.

### ► **Press 'Print' and Walk Away**

Our improved batch printing truly streamlines and simplifies the production process - for any sized firm. The new Batch Print Wizard (shown right) allows E-Transcript Manager users to Add/Remove transcripts from the batch print. Then, users can assign print quantities for full sized transcripts, condensed, and word indices. Finally, the intuitive Batch Print Wizard enables users to select different printers for different aspects of the job. For instance, the firm's color printer may be selected for cover pages since they contain the firm logo, while all others print on a black and white printer.

### ► **Improve Condensed Printing**

The condensed printing capabilities of RealLegal E-Transcript have always been helpful and convenient. In E-Transcript 5.0, we've expanded upon the condensed printing virtues to make better use of white space and increase font size. As a result, your condensed transcripts use paper more efficiently and are more legible.

Shown here: Three consecutive screens from the new Batch Print Wizard.

### ► **Convey Your Firm's Brand**

RealLegal E-Transcript Manager users can now market their firm and its brand with a new utility for cover pages. When formatting your cover page, simply drop in your logo in any standard image format. Or, take a new approach to errata sheets by scanning in the actual errata sheet from a witness, saving it as an image, and dropping the file into your blank errata sheet within E-Transcript Manager.

### ► **Preserve the Integrity of Files**

RealLegal E-Transcript 5.0 eliminates any confusion about .PTX and .EXE formats. Simply send your E-Transcript files in the .PTX format (to avoid firewall restrictions) and ask your clients to download the new E-Transcript Viewer from [www.reallegal.com](http://www.reallegal.com) for free. They will only need to download it once! Then, when receiving your .PTX files via e-mail, they can *easily* save it to their computer - as an E-Transcript - and then open within their computer's new E-Transcript Viewer at their convenience.
