

ELECTRONIC TRANSCRIPT PRODUCTION

THE ONLY COMPLETE SYSTEM FOR PRODUCING SECURE AND CUSTOM-FORMATTED, SIGNED TRANSCRIPTS

Used by more than 70% of the court reporting industry, RealLegal E-Transcript™ technology is the benchmark for electronic transcripts. An E-Transcript file ensures page and line integrity, allows for custom formatting, and offers the security of a tamperproof, electronic signature. It's the standard delivery format for tens of thousands of litigators nationwide. E-Transcript files are created with RealLegal E-Transcript Manager™ or RealLegal E-Transcript Reporter Edition™, and they can be electronically signed with E-Transcript Signatures™.

E-TRANSCRIPT REPORTER EDITION

E-Transcript Reporter Edition™ creates a virtual pipeline between a court reporter's individual computer and the agency's production queue. The application enables reporters to:

- Import ASCII files
- Share files with scopists or proofreaders
- Apply an E-Transcript Signature (optional)
- Send the edited transcript and turn-in sheet directly to the agency's E-Transcript Manager inbox
- Avoid unnecessary courier fees, rushed visits to the agency, and the risk of losing files in email
- Easily manage multiple jobs for different agencies

E-TRANSCRIPT MANAGER

E-Transcript Manager™ provides a central dashboard for agency production staff to manage multiple reporters, transcripts and jobs.

- Automatically receive E-Transcript files from reporters in the field, or, import transcripts directly
- Tailor the appearance (such as font styles and cover pages) for each client and utilize full-sized or condensed printing options
- Automatically build a hyperlinked word index to enable clients to quickly locate relevant testimony
- Protect the transcript with optional lockout codes and passwords
- Apply a tamper-proof E-Transcript Signature (optional)

Absolutely no special software is required – the free E-Transcript Viewer™ is all the attorney needs. The fact that the E-Transcript Viewer has been downloaded more than 400,000 times by attorneys and legal professionals demonstrates its overwhelming popularity. E-Transcript files are also compatible with West LiveNote®, West Case Notebook®, and other popular litigation software.

E-TRANSCRIPT SIGNATURES

E-Transcript Signatures™ are considered superior to printed signature pages because they make transcripts 100% tamperproof, and attest to both the contents of the transcript and the identity of the signer. E-Transcript Signatures can be applied from either E-Transcript Manager or E-Transcript Reporter Edition.

West LiveNote and West Case Notebook users have the added convenience of being notified whether or not the transcript has been sealed with an E-Transcript Signature.

KEY ADVANTAGES

- Enable reporters in the field to create and securely send E-Transcript files directly to the agency's production queue
- Customize fonts, condensed and full-sized versions while keeping page and line integrity
- Ensure the security of a transcript with digitally certified E-Transcript Signatures
- Provide attorneys with a secured, and properly formatted, electronic transcript with a searchable keyword index

THE E-TRANSCRIPT SUITE

The RealLegal UnlimitedSM subscription program includes E-Transcript Manager software plus unlimited E-Transcript Reporter Edition installations and unlimited E-Transcript Signatures. The subscription program also includes all upgrades as well as technical support.

For more information, call your Court Reporting Technology Representative at 1-800-548-3668 or visit us online at www.RealLegal.com.

E-TRANSCRIPT MANAGER allows you to create secure E-Transcript files, organize all jobs from one location, customize font styles and condensed or full-size options, and archive transcripts. (See Fig. 1)

E-TRANSCRIPT REPORTER EDITION allows reporters to manage individual mailboxes for each agency they work with. In addition to always getting the right transcript to the right agency in a timely manner, Reporter Edition enables the reporter to collaborate with proofreaders. (See Fig. 2)

E-TRANSCRIPT SIGNATURES certify that a finished transcript has not been altered. An image of each reporter's signature appears at the end of the file, but it's the unique digital "fingerprint" resulting from a complex algorithm that seals and certifies the transcript. The E-Transcript Signature attests to both the contents of a transcript as well as the identity of the signer. (See Fig. 3)

Clients are able to view E-Transcript files with the free **E-TRANSCRIPT VIEWER** or import them into LiveNote or other litigation software. The word index embedded in every file makes for the easy searching of key terms within the transcript. (See Fig. 4)
